

Touch screen terminal for access control and management of printers and MFPs

cPad + TCM3 contactless card reader (in option)

cPad network terminal connected to a printer or a MFP, provides access control and identification by Login / Password, print code and/or card (optional badge reader).

This new generation device, with its modern and sober design, is a handsome addition to your printing and copying units.

cPad advantages

- ✓ Quick identification by using the ergonomic and virtual keyboard or, in option, the various card readers (contactless, bar code or magnetic ISO).
- ✓ A personalized interface for the identified user.
- ✓ A friendly selection of documents to print.
- ✓ Generic interface compatible with most printers and MFPs of the market.

cPad: the value added of the touchscreen

USER INTERFACE

- ✓ The intuitive user interface allows a quick start FROM the first use, it displays the user's credit before and after the operation, as well as tariffs of scans, copies and prints (A4, A3, W&B / Colour and possible discounts on Duplex).
- ✓ The user can select one or more documents in the queue list of prints, release them, delete them or display more information.
- ✓ The selection of a job / a project code in a list is easy and friendly.
- ✓ A single interface for copying and printing whatever the brand and model of the copier.
- ✓ The interface can be presented to the logos and colours of your structure.
- ✓ The operator mode allows to grant extended rights to some users (viewing and release of the prints of all users).
