

Bar code card reader of identification for MFPs and networked printers

The **Cartadis TCBK01** is used together with a **Cartadis networked terminal** and a **centralized management solution for copies and prints**. It enables every user to be identified by just passing his card through the reader for releasing his printings to printers or multifunction copiers (Print@me and Global Print@me functions) and getting copies made on multifunction copiers.

The **Cartadis TCBK01** is a barcode card reader running with cards already used for access control, time control, canteen, etc ... for counting every user copies and printings.

The cards must be printed with bar codes. The **Cartadis TCBK01** reader accepts most of barcodes on the market.

Networked terminals compatible with the TCBK01
