

USB reader of MIFARE[®] and 125 Khz contactless cards for PC, MFP and network printers

The **Cartadis TCM2** is an USB reader of contactless cards for the use of RFID cards, it allows to use the cards already circulating in a firm for a user authentication.

Installed on a MFP:

It enables **every user to be identified by just passing** his card through the reader to release his printings to printers or multifunctions (featuring a Follow-me option) and to get copies made on multifunction copiers.

Installed on a PC with the « Cartadis Pay Print Solution (CPPS) software»:

It enables **Mifare cards to be accepted with an electronic purse** for the payment of printings.

The Cartadis TCM2 advantages for your daily uses

- ✓ Up-to-date and valued unit, the identification by MIFARE card also enables copies and printings to be quickly recovered on the machine.
- ✓ Multi-technology, MIFARE (13,56 Mhz) or 125 Khz cards can be read.

TCM2: added value device

- ✓ It enables, to educative structures, a **contactless payment by means of the Cartadis electronic purse** which we can fit in the MIFARE cards (together with the use of the « Cartadis Pay Print Solution » software).

- ✓ The USB communication may be set, depending on the choice, in keyboard HID protocol or CCID communication.
- ✓ A configuration tool, standard supplied, enables transformation filters of the card identifiers to be installed.

Specifications

- ✓ The cards must be of contactless technology and match one of the following standards:
 - . ISO1443-A/B
 - . Mifare®
 - . ISO15693
 - . 125 khz HID Prox
