

Autonomous reloader of magnetic cards for the payment of copies and printings

According to the Cartadis CR9STD chosen, magnetic cards can be reloaded against coin and/or banknote insertion (description overleaf).

It enables cards to be reloaded, whether their credit had already been spent out or not.

Such cards are solely intended for the **Cartadis** terminals of access control and payment for MFPs and printers.

With **Cartadis CR9STD** and a set of Cartadis terminals, you can fit out a site of several copiers for full "self-service" operation.

This solution is particularly suitable in **libraries, public sites, or educational environments**.

The CR9 advantages

- ✓ An intuitive and ergonomic touchscreen that allows the display of the user credit and prices.
- ✓ Reloading of cards by using coins and/or banknotes.
- ✓ Reloading of cards still having a credit.
- ✓ Reloading of cards with 6 decreasing prices available.
- ✓ For a site management without requiring staff for reloading cards.

Statistics

Reloading statistics can be read by the person in charge of the unit and viewed on the screen, or downloaded via an USB key. These data consist of: receipt on the current period, receipt from installation.

Cards

The Cartadis reloadable magnetic cards are credit-card sized and in high coercivity technology avoiding demagnetization.

The range of CR9 reloaders

The range of CR9 dispensers enables the various ways of payment to be accepted.
