

Card dispenser, creation and reload of  Gespape accounts for the payment of copies and prints

The DRC10STD system is an optional equipment of the Gespape solution, it is connected to the server via a TCP/IP network. It enables user accounts to be both created and reloaded but also contactless cards to be sold.

In a Gespape environment, registered users can reload their account **by coin and/or banknote** according to the model.

Users are identified by entering a Login / Password from the touchscreen or by passing a contactless card through the integrated reader.

For new users of the service, the **DRC10STD** automatically creates and distributes a card associated with an anonymous account that the user can customize by accessing to the web interface.

This account gives the user the possibility to print and photocopy throughout the fleet of MFP managed by the **Gespape** solution.

The DRC10 advantages for the user

- ✓ A full “self-service” operation of the copy and print service.
- ✓ An intuitive and ergonomic touchscreen that allows the display of the user credit and prices.
- ✓ Reloading of accounts by using coins and/or banknotes.
- ✓ Full “self-service” account creation.
- ✓ Purchasing and dispensing of contactless user cards.
- ✓ Quick identification by contactless card or via the ergonomic keyboard.
- ✓ Amount for free reloading with graduated tariff.

The DRC10 advantages for the administrator

- ✓ An autonomous copy and print service without staff requirement.
- ✓ From the Gespage interface of the server, price setting of:
 - account reloading with degressive price available,
 - card dispensing with, possibly, a credit associated to their account.
- ✓ Reliable and rugged system.
- ✓ Viewing of sales statistics from the touchscreen.
- ✓ Detailed statistics such as: turnover over a period and total, number of cards sold, amounts reloaded on accounts, number of banknotes collected ...
- ✓ Interface and home screen customizable to the image of the service provider.

Example of use

The **Cartadis DRC10STD** is especially suitable for a use in schools, public or university libraries. Students buy a card associated to an account, reload their account from the dispenser and use this credit on all the copiers of the different sites of the establishment.
