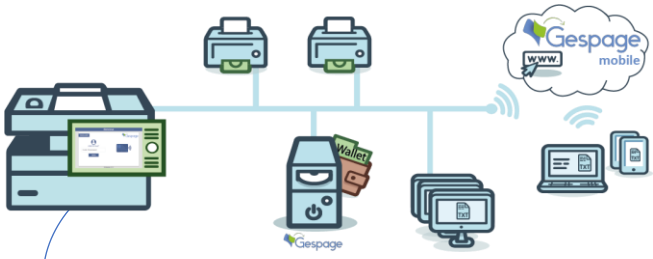
Smart software of management
Print, Copy, Scan

Manage your fleet, Secure access to printings, Reduce costs, Process of scan



Gespage can manage your printers and multifunction devices in a simple, smart and centralised way.

Apart from the server functions, Gespage features embedded software terminals that runs directly on MFPs. Such software can perform the authentication function, management of printings and possible changes from the screen of the equipment.

Gespage is compatible with the major brands of MFPs.
Gespage makes your print system GDPR compliant.

Manage

- MFPs and printers
- Active Directory
- Mobile systems
- Remote sites
- Universal Print

Secure

- Access & authorisations
- Secured prints
- Print from where you are

Optimize

- Printing policy
- Quotas, payments
- Customized reports
- Costs reduction
- Counters & monitoring
- Advanced scan
- Additional equipment

Architecture of Gespage

- ✓ Gespage solution is compatible with all Windows or Linux server operating systems.
- ✓ A Gespage server can monitor several print servers, including a mix of Windows and Linux servers (including remote, autonomous and separate networks).
- ✓ Thanks to printer aggregation, print servers become redundant.
- ✓ The software and its pop-up are compatible with all types of stations: Windows, Linux/Unix, MAC and thin clients.
- ✓ The solution is managed from an ergonomic and secured Web interface, taking into account the access rights.
- ✓ For more security, Gespage features an event log, automatic purges and backups. Finally, it is compatible with Microsoft high availability.

All Gespage licences include:

- Print server license
- Print2me
- Free agents to deploy on print servers
- Mobile printing of PDF and Office documents
- Free popup to deploy on posts if needed
- A software for payment stations
- Copy Shop module
- Multi-site management (remote)

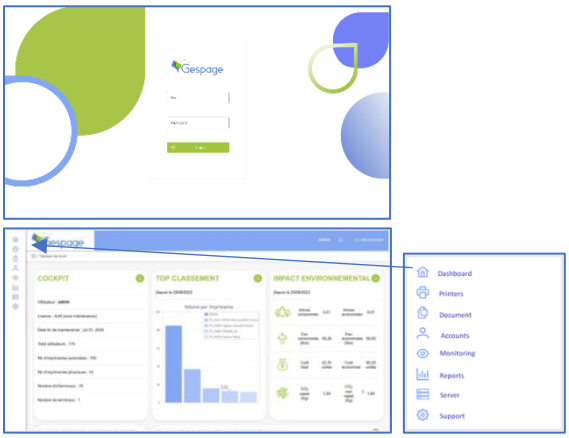
On MFP not compatible embedded software or for authentication on printers, cPad may be used.

✓ **Gespage MFP** (Multi-Function Printers)
- Copier embedded software (eTerminal)
- 5 physical Equipment or Printers (compatible with cPad Equipment).

✓ **Gespage EP** (Equipment and Printers)
- 5 physical Equipment or Printers.

New interface

- ✓ Gespage features an interface with a user-friendly and intuitive design for all, ensuring a smooth start to each Gespage administration session at the login screen.
- ✓ An intuitive administrator interface to enhance efficiency and productivity by providing quick access to sub-menus and solution functions.
- ✓ A user-friendly interface for a printing service that operates simply and autonomously.



Manage

MFPs and printers

- Control of access and authorisations to the printers and MFPs.
- Use of embedded terminals to identify users by username/password, code, contactless card or smartphone.
- Modification of the job properties (forcing of the prints in B&W, duplex or the number of copies).
- Set up an account management with quotas or payment.
- Jobs management (project code).
- OCR processing of scan.

Active Directory

100% adjustable LDAP synchronisation by means of scripting. Gespage ensures compatibility with all client directories regardless of the architectural structure (including Azure AD). Gespage can thus adapt to any AD/LDAP format and provide a quality service, such as the real-time taking into account of customer files for invoicing, the recovery of the company organisation chart, or the parallel use of many LDAPs for large organisations.

Embedded eTerminals

brother Canon DEVELOP
EPSON KONICA MINOLTA KYOCERA
LEXMARK hp Olivetti
Rex-Rotary RICOH SHARP
TOSHIBA Triumph-Adler xerox

Mobile systems

- Service accessible to all, all the time, from any equipment connected without print driver installation, via a web page, by sending an email (guest mode) or via the Android/iOS App.
- Consult your account (credits and operations).
- Printer selection by QR Code.
- Print documents, photos…
- Setup print parameters (format, number of copies, double-sided...).

Gespage-Remote for remote sites

Gespage-Remote is installed on remote servers, it allows remote sites to operate independently and consolidates data on a master site.

- ✓ Autonomous operation of remote sites in the event of power failure of the Central Site.
- ✓ Customised access to a management Web interface for each server (with access rights).
- ✓ Consolidation of data on the Central server.
- ✓ Compatible with Windows or Linux servers (heterogeneous sites).
- ✓ Recovery of machine counters of all sites.
- ✓ Synchronisation with a common directory (AD or LDAP) or the directories of each site.

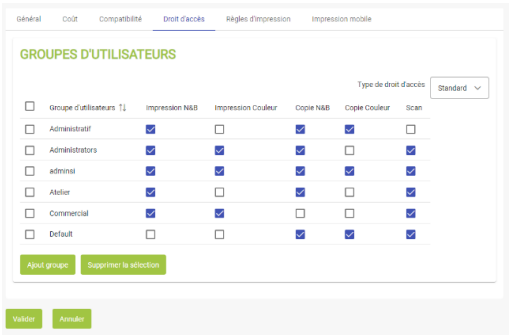
Universal Print Compatibility

- No printer driver for compatible machines
- No local print server
- Azure Active Directory support
- Intelligent management by Gespage with a server or in the cloud.

Secure

Access and authorisations

- Management of rules for access to Gespage administration tool.
- Management of user accounts.
- Management of printer monitoring.
- Management of job reports.
- Management of the server configuration.
- Some users may be entitled to view reports and others may be limited to set printers.
- Encrypted communication between print servers and Gespage server.



Secured prints

- Gespage benefits from an advanced compatibility with the range of Cartadis management terminals, enabling access control by codes and contactless cards.
- Gespage incorporates a higher level of document safety, with enabled points of print according to the level of the documents, ensuring reliability, confidentiality and safety for which Gespage is clearly distinct from the market.

Print where you are

- **Print2me**: printing wherever you are on the network.
- **Global Print2me**: printing wherever you are, on any network of your structure.
- Operator printing possibility or by delegation.

Optimize

Printing policy

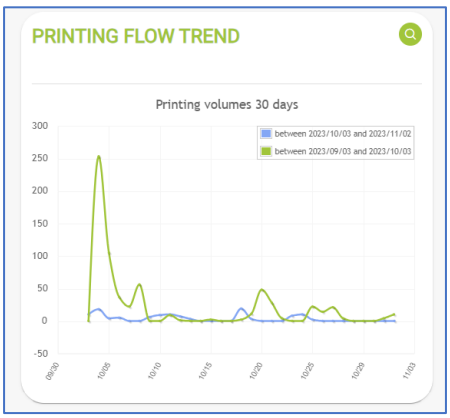
- Redirection rules of print flows configured by predefined rules or definition of scripts allowing to handle 100% of client requirements.
- Possible redirection between separate servers and even between different platforms. A document from a Windows server can be redirected to a Linux server.
- Creation, with scripts, of custom redirection rules.

Quotas, payments

- Gespage is the only solution on the market to manage simultaneously 3 quotas: user quota, department quota, job quota.
- Gespage is the only solution on the market to operate with “purse cards” associated with user accounts registered in the database.
- "Web Payment" application to reload user accounts by bank card (use of Ingenico ePayments or PayPal gateways).

Customized reports

- Detailed reports on printed page volumes by user, department, job and equipment. These reports are editable in Pdf or exportable on Excel.
- Automation of the tasks: sending of reports by mail, automatic addition of credits, sending by email of configurable alerts …



Reduction of costs

- Unprinted documents are purged automatically after a configurable period.
- A report on "environmental savings" measures the volume of carbon saved.
- Gespage is a generator of measurable savings. By choosing Gespage, you will measure yourself the savings generated by this solution, which finds its profitability (ROI) in 6 months.

Counters & monitoring

- Counter monitoring tool with distribution of printed page volumes (B&W and colour or copies and prints).
- Event log issuing with "Printer Monitoring" (levels of consumables and paper, information of faults such as jams, login errors, unknown cards, AD synchronisation errors ...).

Advanced scan

- Advanced management of scans with quick selection of scans to the user's email, to a personal directory or to shared directories between groups of users. Also compatible with One Drive.

Additional equipment

- A range of materials makes it possible to rely on management terminals in front of the points of print. With over 40 years of experience and development CARTADIS has know-how and many terminals.
- Ask for the brochure on the range of equipment running with Gespage.

Ref: GESPAGE software EN 11 23. CARTADIS reserves the right to alter any feature and/or equipment without forewarning.
