

# CD6/CD7

Automatic dispenser of any paper or plastic cards  
in ISO7816 format

These dispensers enable **paper or plastic cards** to be dispensed against coins and / or banknotes.

There are two versions according to the type of cards dispensed:

- Cartadis CD6 for paper cards,
- Cartadis CD7 for plastic cards.

Such cards may be intended for:

- any unit running with paper or plastic cards in ISO7816 format,
- the Cartadis units of access control and payment for MFPs and printers.

## The CD6 or CD7 advantages

- ✓ The dispenser is fitted with an intuitive and ergonomic touchscreen
- ✓ Payment of the cards by coins and/or banknotes.
- ✓ Dispensing of cards in ISO7816 format.
- ✓ The unit is fitted with a proven management system.
- ✓ For a site management without requiring staff for selling cards.
- ✓ Reliable and robust unit.

## Statistics

Cash checking is ensured by sales statistics that the person in charge of the unit can consult directly on the screen of the unit or download via USB.

These data stored consist of receipts and cards sold on the current period and from installation.

## The range of CD6 or CD7 dispensers

The range of CD6 paper card dispenser or CD7 plastic card dispenser feature the various ways of payment described in the following table:

	CD6STD - P	CD6STD PB	CD6STD - B
	CD7STD - P	CD7STD PB	CD7STD - B
Coin mechanism	X	X	
Banknote reader		X	X

## Cartadis compatible units

With Cartadis CD6 and a set of Cartadis terminals, you can fit out a site of several copiers for full "self-service" operation. This solution is particularly suitable in **libraries, public sites, or educational environments**.

It enables the Cartadis disposable paper magnetic cards and loaded to be sold.

TC4N/TC11N/TCRS magnetic card readers
