

DJ3

Wall mounted dispenser of tokens and/or cards by credit cards and/or coins and banknotes

Credit card

The DJ3 dispenser is fastened on a wall, up to 3 dispensing hoppers of tokens and a dispensing mechanism of subscription cards may be installed.

It features all means of payments: credit cards, subscription cards, coins and banknotes.

Compatible **VashAdmin** (remote monitoring of your station). The high brightness touch screen provides simplification of use. In addition to voice assistance, 3D animations guide the customer at every step and it is a multilingual system.

Token dispensing

Win customer loyalty with tokens

- The tokens dispensed are used to pay for the services of gantry washing, high-pressure or vacuum. There are three hoppers for dispensing 3 types of tokens or giving change back. An anti-lock system of tokens ensures a reliable and lasting distribution. Dispensing runs at the speed of 4 to 5 tokens per second.

Subscription card dispensing

Win customer loyalty with cards

- It can also dispense subscription cards loaded with a value when they are dispensed (no stock of preloaded cards and value loading of the card on request).

Payment modes

By coins

- The coin mechanism is fitted with a pre-receipt system giving back the coins inserted in case the user cancels his request.
- The coin acceptance is adjustable from 0,05 € to 2 €.

Banknotes

- Banknotes are accepted for the payment of tokens and/or cards.

Credit cards

- Whatever the terminal is networked or isolated, the bank registered (bulletin 13) terminal performs the secured transaction before dispensing the tokens. A printer issues a receipt ticket of the credit card payment.

Cartadis equipment compatible

DJ3 works with Cartadis subscription contactless cards.

TL14

Modular terminal of payment
for high-pressure track
(Contactless card)

TCM2-CSHP

Reader for high-pressure
and vacuum terminals
(Contactless card)

TL12

Modular terminal of
payment for gantry
(Contactless card + code)

Technical specifications

- Dimensions : H85 x W65 x D40 cm
- Weight: about 50 Kg according to the options
- Max thickness of the wall: 35 cm
- Power supply: 230V AC, 100W
- 7 Inch colour graphic display, waterproof keyboard with capacitive keys.
- 3 hopper models for token dispensing:
 - 19 to 26.4 mm (standard)
 - 16.25 to 20.9 mm (optional)
 - 21 to 30mm (optional)
- Card dispenser mechanism dispensing any credit card sized card
- Banking terminal: PCI PED V1.3
- Banking terminal communication: Ethernet
- Option: 3G Modem.

Prerequisite:

- Credit card banking contract.
