

# TC11N

## Copy vending by debit cards

The **Cartadis TC11N** is a card reader designed for being connected to any make of copiers.

Users in the possession of prepaid cards can make copies up to the limit of the value available on their card.

### The Cartadis TC11N benefits

#### Libraries, Schools:

Libraries often propose self-service copy. The cost of copies for users is provided with a simple and practical way of payment. The **Cartadis** debit cards are ideal. They are first recorded with copies or currency and sold by automatic dispensers or at a counter on the site. The owners of such cards will use freely the copiers or any other unit fitted with **Cartadis units**.

#### Copy shops:

**Cartadis** debit cards lead to your customers' loyalty by giving a modern appearance to your installation.

#### Companies:

**Cartadis** debit cards can be considered as a budget for copies. This budget can be managed the same way you are using for managing your office supplies or other.

## The cards and compatible units

The **Cartadis TC11N** cards are credit-card sized featuring the high coercivity magnetic technology for safety and reliability purposes. Two types are available:

- ✓ reloadable cards,
- ✓ disposable cards (not reloadable).

Both cards are supplied blank and need to be recorded before use on the **Cartadis TC11N**. A reloadable card can be revalued and reused several times while a disposable card can be loaded only once.

A special “administration” card is intended for the person in charge of the copier, it enables to both programm cards and access to the **Cartadis TC11N** functionalities.

For a nonstop site management without requiring staff, the **DRC9** autonomous dispenser/reloader enables reloadable cards to be sold or the **CD6** dispenser enables disposable cards to be sold.

DRC9STD autonomous dispenser/reloader
