- ✓ Multilingual system

Payment methods

- ✓ Credit cards
- ✓ Coins
- ✓ Tokens
- ✓ Banknotes
- ✓ RFID privative cards
- ✓ Washes with code
- ✓ Smartphone

Featuring a worthwhile design, the TL12 terminal provides pay-per-view services and payment modes.

It is used for controlling a wash gantry and selling unit or subscription washes in self-service. It also enables token dispensing and subscription card selling.

The high brightness touch screen provides simplification of use. In addition to voice assistance, 3D animations guide the customer at every step.

Wash services

The unit wash

- Payment by coins or tokens, upon pre-receipt (the customer can recover his money if his wash has not been launched).
- Payment by code: the customer buys a code from the shop on the **TLC6** terminal then enters it on the **TL12** gantry.
- Payment by credit card: whatever the terminal is networked or isolated, the registered bank terminal performs the secured transaction before launching the wash. A printer issues a receipt ticket of the credit card payment.

The subscription wash

- The MIFARE technology of contactless card is used for managing an electronic purse of wash. The card is initially recorded with a wash credit, it is then deducted once the wash has been launched.

Token dispensing

Win customer loyalty with tokens

- The tokens dispensed are used to pay for the services of gantry washing, high pressure or vacuum. 2 types of tokens may be dispensed by means of two hoppers. An anti-lock system of tokens ensures a reliable and lasting distribution.

Subscription card dispensing

Win customer loyalty with cards

- It can also dispense subscription cards loaded with a value when they are dispensed (no stock of preloaded cards and value loading of the card on request).

Technical specifications

- Dimensions: H158 x D40 x W48 cm.
- Weight: about 70 Kg according to the options.
- Power supply: 230V AC, 100W.
- 7-inch colour graphic display, waterproof keyboard with capacitive keys.
- 3 hopper models for token dispensing:
 - 19 to 26,4 mm (standard)
 - 16,25 to 20,9 mm (optional)
 - 21 to 30 mm (optional).

Prerequisite:

- Credit card banking contract.
- Subscription to a payment gateway (with or without phone service).
